

Advanced Recovery Processes

A Better Way to a Greener Tomorrow

Circon collects and acquires off-spec materials and overages, and then treats, processes, and sells them as a high-quality product. Almost zero waste, and plenty of benefits.

Our Numbers Show It.*

750,000

OVER 750,000 BARRELS OF MIXED FUELS PROCESSED AND RECYCLED IN OUR DISTILLATION UNIT

400,000

OVER 400,000 BARRELS OF GASOLINE GENERATED FROM THE DISTILLATION OF THESE MIXED FUELS

350,000

OVER 350,000 BARRELS OF FUEL OIL CUTTER GENERATED FROM THE DISTILLATION OF THESE MIXED FUELS

400,000

OVER 400,000 BARRELS OF OFF-SPEC MATERIAL PROCESSED AND RECYCLED

*All statistics measured over the last five years.

How We Move

Circon can accept feedstocks by truck, rail, and barge—or provide transportation to move your materials.

Services

Distillation

Through our distillation process, we find new purpose for off-spec products as valuable components of Circon's fuel streams

Oil Recovery Unit

Off-spec tank-bottom materials and slop oil emulsions are recovered, separated, and repurposed, rather than sent to an incinerator or a landfill.
