

# Waste Treatments and Recycling

## A Better Way to a Greener Tomorrow

CIRCON manages hazardous and non-hazardous waste. The results are clean water and newly-blended fuels that are ready to re-enter the industry's life cycle—instead of the liquid landfill.

Our Numbers Show It.\*

### 500MM

500 MILLION GALLONS OF WATER TREATED AND RECYCLED

### 15MM

15 MILLION GALLONS OF OIL RECOVERED FROM WASTEWATER

### 50,000

50,000 DRUMS OF WASTE MANAGED AND PROCESSED

### 1 HOUR

1 HOUR OR LESS TO OFFLOAD TRUCKS AT OUR TREATMENT FACILITIES

\*All statistics measured over the last five years.

## How We Move

We can receive materials via rail, truck, or barge, or transport them using our own fleets for added ease.

## Services

### Wastewater Treatment

We extract oils and fuels from wastewater, cleaning the water so it can be returned to the waterways and turning the recovered materials into alternative fuel.

### Containerized Waste

We recover smaller-quantity waste from across the industry spectrum, repurposing it as alternative fuel within our network of cement kiln partners or safely disposing of it.
