

Stewardship and Responsibility Report

AUGUST 2019

RECYCLING PROCESSES

We recycle material recovered from tank cleaning for use by cement kilns in their processes. The material otherwise would be incinerated and sent to landfills. In 2018:

608 tons of ash to landfills avoided

203,000 gallons of waste-derived fuel sent to cement kilns, displacing **1,216 tons** of coal

26,842 tons of ash avoided since 2013
